DOGS ARE "FAKED."

Cruel Methods of Making Pets Conform to Fashion.

A Long Course of Multreatment Has Produced Malformations as Permanent Types of Dogs.

Time was when dog shows were associated with beer and the church warden pipe in an East end or wayside public house, when the owner of a champion bulldog fed his pet on a pound of rump steak and let his family starve upon a crust. The dog, too, got all the

In our days we have changed all that. The old-time dog show still obtains. and you may occasionally see it advertised in the sporting papers, but there are two powerful associations, who each in their way, with wealthy purses, have improved the lot of the modern day dog and given him a social status.

But with all the power of these two associations against them the tricks and dodges of the dog fakers of old still They have simply changed obtain. their coats.

The dog faker of the past, to get a very small breed of pet dogs, kept the lungs of the animals closed by compression in puppyhood and by plugging the nostrils at stated times stopped a proper system of respiration. The modern faker takes the relics of the older days and inbreeds from the smallest type of dog, and regulates the feeding

To make the eyes of toy spaniels large, bulgy and round and the coats a rich color the animals were kept among the beer barrels in the public house cellars in perpetual darkness. while the spaniel pups were "helped" in the matter of becoming very shortnosed by having the bones surrounding the nose pressed to the head while they were in a soft and tender cartilage state To-day these methods are not so necessary, for a long course of "faking" through many generations has at last produced the malformation as a permanent type, but in the spaniel and many other breeds of dogs the type striven for is still "helped."

When the modern building is chosen from a litter of pups the loosest-skinned is marked out to work upon, and then, to put it kindly, "the fun begins." As the pup gets along in life he is submitted to a process of skin pulling until his head is one mass of wrinkled skin and hanging rolls of fur. Painless, of course but still it is "faking."

The more unacrupulous give an artificial kink to the puppy's tail by breaking the vertebra where nature has forgotten to do it, and pulling the forelegs out at the elbow to give brendth of chest and general all-round looseness of appearance, but this is confined to

Bloodhounds, too, and pugs both have serpent, my daughter." to be "helped" at times, if nature does not conform to the fashion. Landseer's lovely big-eyed bloodhound in his picture, "Dignity and Independence," is not to the taste of modern connolsseurs. He must be padded with roll upon rol of loose skin; his ears must hang low down, and the eyes are all but sightless. hidden away as they are in overhanging Romans have often expressed wonder

Most people will notice how beautifully the highly bred collie drops his ears over. Well, there are dog fakers drostatic principle that water rises alwho keep in the dark, who, if they hapare too strong, and consequently will was that they had no suitable material not drop over, run a needle through the to make pipes which would stand the ear under the skin, and keep the head in splints, as it were, for some time, until the ears drop.

enormous pressure inseparable from an underground system. Lead was out of the question for the purpose because the til the ears drop.

Other methods are followed to weak- pipes would have to be made so disporen the nerves of the ears. Sometimes a drop of acid is put on the nerve, and the ears are pulled and flaps of weighted word are factors at the ears are pulled and flaps of weighted word are factors at the ears are pulled and flaps of weighted word are factors at the ears are pulled and flaps of weighted word are factors at the ears are pulled and the ears are pulled and flaps of weight. pipes were used by them in their cities ed wood are fastened to them.

Other ways of faking dogs include and houses for the supply of baths, but the pulling out of white hairs and the dyeing of patches of white fur too big dyeing of patches of white fur too big to be pulled out. Cropping and docking pipes to carry water long distances. Lastly, the water brought to Rome was strongly impregnated with lime, and all faking.

It is left, however, for women to do a great work in stamping out the arts openings and cleaning, whereas an and dodges of a bygone, unenlightened time, and in the Ladies' Kennel associa-tion we possess a great purpose in do-with a very moderate amount of teing away with all fakes and fads of dog pairs. dealers .- London News.

Saving Three-Quarters of a Ship. Floating a bowless steamer is a feat lately performed by the Liverpool Salvage company. The steamer Milwau-kee, a cattle carrier of large dimensions. went on the rocks off the Aberdeenshire coast. Scotland, last September. It was found that the forepart was held immovable on the rocks, and the salvage company then determined to cut the hull in two, forward of the boilerroom bulkhead, and save the more valuable part of the ship. This was done by the aid of dynamite; and after the bulkhead had been strengthened by planks and bracing the after two-thirds of the hull, with engines and boilers. was towed into the Tyne, where a new bow will be built to the Milwaukee .-

Chicago Inter Ocean. APPETIZING SAUERKRAUT.

It Was Given to a Sick Cow in Pennsylvania and with Good Results.

A reporter who speci Christmas against the walls of the shaft, with a among the Pennsylvania Germans of space of from five to six feet of ground Lancaster county discovered what will intervening; so that when the current probably be to most people a distine. is turned on it has to cross the face of tively new use for sauerkraut, a native this space to complete the circuit. As production of old Lancaster and a the ground contained therein forms staple article of food, says the Pitts. a resistance to the motion of the elecburgh Times. He had called to see an tricity, heat is generated, and the oid friend who keeps a dairy and foun 1 ground is thawed. The heat thus genthe dairyman in the act of taking great erated can be so controlled that it can bunches of succulent cabbage from a be applied in any manner that will harrel in the cellar. The odor prevaded utilize its full force and effect. heard to talk to each other of the great Sir Henry Campbell-Bannerman has recently risen as the particular star of The bucketful of sauerkraut was the liberal party in England. Speculadumped into the manger. The cow, by tion, which has been rife of late upon some peculiar system of feeding, first the probable leader of the liberals, gave evidence of her appreciation by seems to have selected this Stirlingslowly switching her tail, which had be- Burghs representative as the fittest fore hung limp and lifeless. Then she man to take the place of the great Gladraised her head, poked her great muzzle stone and of the more recent Vernon into the krant and slowly began to Harcourt. Successors always, at least munch the stuff. Fifteen minutes later in the beginning, labor under a painful she looked quite happy. She had eaten disacvantage, for they are invariably all the kraut and was taking great compared with the originals. But it mouthfuls of the hay. The dairyman said sauerkraut had long been known as one of the best things in the world to dent in British history for the newcomer who eclipses the man whose place he takes.

Unfortunately, this happy fate does not seem to be reserved for Sir Henry One of Roumania's Old Nobility Who Campbell-Bannerman, as it might be reserved for Sir Edward Grev. The latter is young; the former is old. Old men are seldom originals. Sir Henry is The Bucharest correspondent of the 63; Sir Edward is 37. The latter is an aristocrat, descended from the very London Daily Mail says that a most extraordinary character lately died in best and noblest Norman blood in the Jassey, namely, Countess Palsch, one of kingdom. The former is a democrat, the last of the old Roumanian nobility, and concedes nothing to his traditions when he becomes the liberal. The only mentary ones, having been abolished question that suggests itself is: Is Sir since the declaration of independence Henry Campbell-Bannerman the man to take Gladstone's place and is he young enough to improve upon the ly rich, was an inveterate miser, and

'grand old man?" Sir Henry is the second son of the fending a lawsuit which her only late Sir James Campbell, of Stracathro, Forfarshire, by Janet, the youngest daughter of the late Henry Bannerman, displeasure by marrying without her of Manchester. He was born in 1836.

HENRY CAMPBELL-BANNERMAN. (Prospective Leader of the Liberals of Great Britain.)

In the days of Sir Henry's youth the university of Glasgow was a leading institution, and near enough to dominate the views of Sir Henry's parents, and to Glasgow was the possible liberal leader sent to be a collegian. Later he turned to Trinity, Cambridge, and came out a bachelor (1858), and afterward is, will probably come farthest from er (1861) a master. In 1872 he assumed the truth. About 300 to 350 pounds is a the surname of Bannerman, because of usual estimate. But a full-grown lion the provisions of an uncle's will-Henry | will tip the scales at no less than 500 Bannerman, of Kent. Very early in life | pounds. Five hundred and forty pounds young Campbell-Bannerman was drawn into politics. In 1868 he was elected to parliament as the representative of the Stray Stories.

tion was given him in the Gladstone ministry of 1892.

It is probable that Sir Henry as a man is more potent than Sir Henry as a politician. By no means strong in debate, and by no means able as an orator, he is yet a powerful factor in the house. tion in pipes and necessitated frequent Beside the great dead premier, either as orator, debater or writer, Sir Henry pales. Yet in his small included sphere | Patriotism in France and Germany. he is possibly even more attractive than was Gladstone. While he will never be worshiped as a hero, he will always be prized as a personal friend. In this fact, perhaps, lies his great strength. An Invention That Is Much in De- His age and consequent experience of | with a French firm, who stole his inventhe ways and words of men give him a tion.
